

Egg Markets Overview

A weekly publication of the USDA AMS Livestock and Poultry Program, Livestock, Poultry, and Grain Market News Division

October 2, 2026

Negotiated wholesale prices for graded loose caged eggs were steady to higher throughout the week on moderate retail interest and light to moderate loose egg interest. Offerings are light to moderate. Supplies are moderate. Trading is mostly slow to moderate. Wholesale prices for national trading of truck lot quantities of graded, loose, white Large shell eggs were \$0.07 higher at \$0.46 per dozen with a steady undertone. The wholesale price on the New York market for formula trading of Large cartonized shell eggs delivered to retailers was unchanged at \$0.82 this week. In the major Midwest production region, wholesale prices for Large, white shell eggs delivered to warehouses were unchanged at \$0.65 per dozen with a steady undertone, along with the price to producers for Large cartonized shell eggs being unchanged at \$0.47 per dozen. The California benchmark for Large shell eggs was \$0.01 lower at \$1.07 per dozen with a mostly steady undertone. Delivered prices on the California-compliant wholesale loose egg market decreased \$0.03 cents to \$0.51 per dozen with a steady to weak undertone. Demand is light to moderate. Offerings are moderate to available. Supplies are moderate. Trading is moderate.

Feature activity for shell eggs at retail grocery stores was higher this week compared to a week ago. Cage-free types dominated features while conventional caged egg promotions remained steady. The average ad price for conventional caged eggs decreased \$0.10 to \$1.31 per dozen. Featuring of [UEP-certified](#) barn/aviary cage-free shell eggs increased. The average ad price is \$2.83 per dozen. Non-organic free-range and pastured shell eggs continue to be the highest featured among the retail chains. Promotions of nutritionally-enhanced caged shell eggs decreased in number and pricing is higher compared to the previous ad cycle. Organic shell eggs were promoted at lower levels than last week with the average price increasing.

The inventory of shell eggs available for marketing at the start of the week was down 2% while the National inventory of Large class shell eggs was also 2% lower. The inventory of Large shell eggs in the Midwest was 1% lower as movement into marketing channels is moderate. The inventory share of Large class shell eggs was up 0.01% at a 47.4% share of all shell egg stocks on inventory at the start of the week. Stocks of cage-free eggs decreased 1% as recent active retail promotional activity increased. Stocks of nutritionally-enhanced eggs was unchanged as last week's retail features had more clearing of stocks. The inventory of organic shell eggs was 10% lower and the inventory of breaking stock was 6% lower as breakers are finding plenty of available offerings to run processing lines full while still building some stocks.
