Egg Markets Overview

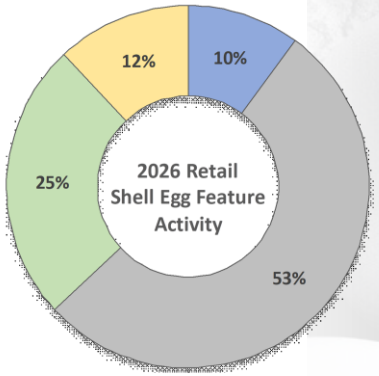

A weekly publication of the USDA AMS Livestock and Poultry Program, Livestock, Poultry, and Grain Market News Division

October 30,2026

Negotiated wholesale prices for graded loose caged eggs were higher throughout the week on moderate retail interest and light to moderate loose egg interest. Offerings are moderate. Supplies are moderate to available. Trading is mostly slow to moderate. Wholesale prices for national trading of truck lot quantities of graded, loose, white Large shell eggs were $0.07 higher at $0.35 per dozen with a steady undertone. The wholesale price on the New York market for formula trading of Large cartoned shell eggs delivered to retailers was unchanged at $0.72 this week. In the major Midwest production region, wholesale prices for Large, white shell eggs delivered to warehouses were unchanged at $0.54 per dozen with a steady undertone, along with the price to producers for Large cartoned shell eggs being unchanged at $0.36 per dozen. The California benchmark for Large shell eggs was $0.09 higher at $1.10 per dozen with a mostly steady undertone. Delivered prices on the California-compliant wholesale loose egg market increased $0.09 cents to $0.60 per dozen with a steady undertone. Demand is light to moderate. Offerings are moderate to available. Supplies are moderate. Trading is moderate.

Feature activity for shell eggs at retail grocery stores was slightly higher this week compared to a week ago. Cage-free types dominated features while conventional caged egg promotions decreased. The average ad price for conventional caged eggs increased $0.10 to $1.42 per dozen. Featuring of UEP-certified barn/aviary cage-free shell eggs increased. The average ad price is $2.98 per dozen. Non-organic free-range and pastured shell eggs continue to be the highest featured among the retail chains. Promotions of nutritionally-enhanced caged shell eggs decreased in number and pricing is slightly higher compared to the previous ad cycle. Organic shell eggs were promoted at higher levels than last week with the average price decreasing.

The inventory of shell eggs available for marketing at the start of the week was up 7% while the National inventory of Large class shell eggs was 11% higher. The inventory of Large shell eggs in the Midwest was 19% higher as movement into marketing channels is moderate. The inventory share of Large class shell eggs was up 1.4% at a 49.2% share of all shell egg stocks on inventory at the start of the week. Stocks of cage-free eggs increased 5.9% as recent active retail promotional activity decreased. Stocks of nutritionally-enhanced eggs increased 9% as last week's retail features had less clearing of stocks. The inventory of organic shell eggs was 3 % higher and the inventory of breaking stock was 7% higher as breakers are finding plenty of available offerings to run processing lines full while still building some stocks.

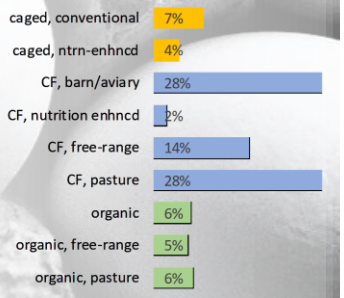

This Week's Supermarket Large Shell Egg Feature Summary
