

DAIRY MARKET NEWS AT A GLANCE

CME GROUP CASH MARKETS (10/2)

BUTTER: Grade AA closed at \$1.3400. The weekly average for Grade AA is \$1.34550 (-0.0190).

CHEESE: Barrels closed at \$1.4525 and 40# blocks at \$1.3150. The weekly average for barrels is \$1.4525 (N.C.) and blocks \$1.2940 (-0.0505).

NONFAT DRY MILK: Grade A closed at \$2.2200. The weekly average for Grade A is \$2.1995 (+0.0580).

DRY WHEY: Extra grade dry whey closed at \$0.8250. The weekly average for dry whey is \$0.8140 (+0.0190).

BUTTER HIGHLIGHTS: Stakeholders report domestic butter demand is moderate in the West region and stronger in the Central region, while no changes are reported for the East region. Export demand is strong and continues to be supported by U.S. butter prices. Spot cream availability remains steady for butter manufacturers. Demand for spot cream is mixed. Butter production schedules are strong. 80 and 82 percent butterfat butter loads are available. Domestic butter inventories are generally not tight. Stakeholders indicate increasing transportation costs are presenting some challenges. Bulk butter overages range from 3 below to 5 cents above market across all regions.

CHEESE HIGHLIGHTS: Milk supplies remain ample nationwide and cheese production schedules are steady. Market participants report no notable shifts in overall milk movement, though elevated fuel costs continue to challenge distribution in several areas. Class III milk is trading between \$0.50-over and \$3.50-over, and spot cheese loads are broadly available, contributing to generally high inventories. Retail cheese demand is firm, supported by increased promotional activity, including widespread advertising of conventional 6-8-ounce shredded cheese at weighted average prices near \$2.45. Domestic cheese demand remains somewhat soft, while export interest is strong. CME 40-pound blocks closed at \$1.2700 on Wednesday, down from \$1.3075 last Friday. Freight costs are up roughly 50 percent from year-ago levels and continue to affect long-distance hauling and widen market spreads. The overall cheese market tone is steady.

FLUID MILK HIGHLIGHTS: Milk supplies vary across the country this week. Supplies are heavy in the East and light to moderate in the Central and West regions. Class I demand is moderate in the East, with good demand from UF plants. School sessions continue to support Class I. Class II demand is moderate to good nationwide. Strong demand for Class II yogurt remains supportive of the market as ice cream production begins its seasonal decline. Class III demand is moderate in the East, with increasing demand for cream cheese

expected over the holiday period. Class III demand is solid in the Central region, supported by continued cheese orders and sales. Class III demand is moderate in the West. Central Class III spot milk prices range from \$0.50 over to \$3.50 over Class. Class IV demand is moderate in the East, Central, and West regions. Cream supplies are heavy in all three regions. In the East, Class II condensed skim prices remain flat to over Class II and Class III condensed skim prices remain flat to over Class III. Contacts in the West region note condensed skim milk offerings and demand are moderate. Cream multiples for All Classes: East 1.20-1.50, Central 1.12-1.35, West 1.10-1.24.

DRY PRODUCTS HIGHLIGHTS: Low/medium heat nonfat dry milk (NDM) prices increased across both ends of the price range and throughout the mostly series in the East and Central regions this week. In the West, prices rose at the upper end of the range but remained steady at the lower end. High heat NDM prices also moved higher at both ends of the price range this week in the Central and East regions. In the West, the bottom of the price range held steady while the top increased. Dry buttermilk prices in the Central and East regions increased at the top of the range, while the bottom remained unchanged. In the West, dry buttermilk prices were unchanged. Dry whey prices in the East increased at the higher end of the range, with the bottom unchanged. In the Central region, dry whey prices rose across both the full range and the mostly series. In the West, prices increased at the bottom of the range, while the top remained unchanged. Dry whole milk prices increased at both ends of the range for Week 40. Whey protein concentrate (WPC) 34% prices edged lower at the bottom of the range, held steady at the top, and the mostly series remained firm. Regular and instant WPC 80% were mostly trading from the low \$10s to the mid \$11s. Whey protein isolate (WPI) prices remained in the \$14s, with a firmer tone and tighter availability than WPC 80%. Lactose prices increased at both ends of the range as well as in the mostly price series. Acid casein and rennet casein price ranges were unchanged this week.

ORGANIC DAIRY MARKET NEWS: The Transition to Organic Partnership Program (TOPP) was formed through cooperative agreements between the USDA and non-profit organizations and invested \$100 million from 2022-2026 to provide technical assistance and support for transitioning and existing organic farmers. The TOPP initiative ended on September 30, 2026, though participating organizations plan to continue providing support for new and transitioning farmers.

CONTINUED FROM PAGE 1

At Arizona State University, the Swette Center for Sustainable Food Systems launched a new mentorship program, as a follow up to TOPP, named Kernel, on October 1. The NOP Organic Insider from September 25th discussed a publication in the Federal Register titled National Organic Program: Notice of Intent to Extend and Review a Previously Approved Information Collection (2027). The public is welcome to make comments regarding the accuracy or necessity of information collected through November 24, 2026.

FINAL CLASS PRICES (FMMO): The following are the September 2026 class prices under the Federal milk order pricing system and changes from the previous month: Class II: \$17.60 (\$-1.11), Class III: \$16.04 (\$-0.60), and Class IV: \$18.94 (\$+1.58). Under the Federal milk order pricing system, the butterfat price for September 2026 is \$1.4762 per pound. Thus, the Class II butterfat price is \$1.4832 per pound. The protein and other solids prices for September 2026 are \$2.6619 and \$0.4147 per pound, respectively. These component prices set the Class III skim milk price at \$11.27 per cwt. The September 2026 Class IV skim milk price is \$14.27, which is derived from the nonfat solids price of \$1.5343 per pound. The product price averages for September 2026 are: butter \$1.4462, nonfat dry milk \$1.7891, cheese \$1.5577, and dry whey \$0.6694.

AUGUST MARKET SUMMARY AND UTILIZATION: During August, 13.7 billion pounds of milk were received from Federally pooled producers. This volume of milk is 5.3 percent higher than the 2025 volume. Regulated handlers pooled 3.3 billion pounds of producer milk as Class I products, up 0.8 percent when compared to the previous year. The all-market average Class utilization percentages were: Class I = 24%, Class II = 13%, Class III = 54%, Class IV = 9%. The weighted average statistical uniform price was \$18.75 per cwt, \$0.43 lower than last month and \$0.60 lower than last year.

AUGUST COLD STORAGE (NASS): Total natural cheese stocks in refrigerated warehouses on August 31, 2026 were up slightly from the previous month and up 2 percent from August 31, 2025. Butter stocks were down 5 percent from last month but up 10 percent from a year ago.

AUGUST AGRICULTURAL PRICES (NASS): The All-Milk price received by farmers was \$19.80 in August, down \$1.10 from August 2025. The alfalfa hay price was \$206.00 in August, up \$35.00 from August 2025. The corn price was \$4.45 in August, up \$0.49 from August 2025. The soybean price was \$12.10 in August, up \$2.10 from August 2025. The milk-feed price ratio was 2.00 in August, down 0.47 from August 2025. The index of prices received by farmers during the month of August 2026 was up 2.5 to 135.5 compared to the prior month and down 2.8 from the prior year. The index of prices paid by farmers for commodities and services, interest, taxes, and wage rates in August 2026 was 159.8, down 2.0 from the prior month and up 8.0 points (5.3 percent) from the prior year.

WEEKLY GROCERY STORE ACTIVITY: In week 40, conventional and organic dairy ads increased. Conventional ads rose 22 percent and organic ads jumped 40 percent. Cottage cheese and flavored milk appeared more frequently in conventional ads, while cheese and ice cream remained the most advertised conventional items. Ice cream and butter saw the sharpest increase in organic ads and organic milk continues to take the spotlight as the aisle's most heavily advertised organic item.

COMMODITY	MONDAY Sep 28	TUESDAY Sep 29	WEDNESDAY Sep 30	THURSDAY Oct 01	FRIDAY Oct 02	WEEKLY CHANGE	WEEKLY AVERAGE
CHEESE BARRELS	1.4525 (N.C.)	1.4525 (N.C.)	1.4525 (N.C.)	1.4525 (N.C.)	1.4525 (N.C.)	(N.C.)	1.4525 (N.C.)

Prices are USD per lb. in carlot quantities. Carlot unit weights: Cheese, 40,000-44,000 lbs.; Nonfat Dry Milk, 41,000-45,000 lbs.; Butter, 40,000-43,000 lbs.; Dry Whey, 41,000-45,000 lbs. Weekly Change is the sum of daily price changes. Weekly Average is the simple average of the daily close prices for the calendar week. Weekly Average Change is the difference between current and previous Weekly Average. Computed by Dairy Market News for informational purposes.

Five days of trading information can be found at <https://www.cmegroup.com/trading/agricultural/spot-call-data.html>

BUTTER

EAST

No changes are reported in churn schedules or cream availability in the East. Contacts note that milk remains abundant. Grade AA butter closed on the CME Wednesday at \$1.3600, compared to \$1.4000 at last Friday's close. Last week's Grocery Store Dairy Feature Activity report shows 2,869 Northeast stores advertising conventional one-pound butter, compared to 645 stores a year ago. The Northeast weighted average advertised price for conventional one-pound butter is \$3.50, compared to \$4.63 a year ago. The national weighted average advertised price is \$3.51. The butter market tone is steady.

All First Sales, F.O.B., Grade AA, Conventional, and Edible Butter
Bulk Basis Pricing - 80% Butterfat \$/LB: -0.0200 – +0.0500

CENTRAL

Milk supplies are increasing across the Central region, and contacts indicate that spot milk loads are currently available. Industry stakeholders report ongoing distribution challenges as elevated diesel fuel costs persist nationwide. Cream supplies remain steady, with spot loads accessible throughout the region. Butter manufacturers note active churn schedules, and butter production remains strong. Stakeholders also indicate continued improvement in retail butter demand. Grade AA butter is trading near unchanged levels, holding flat to the CME. Inventories of 80 percent butterfat remain ample, while contacts continue to report tight availability for 82 percent butterfat.

All First Sales, F.O.B., Grade AA, Conventional, and Edible Butter
Bulk Basis Pricing - 80% Butterfat \$/LB: -0.0300 - +0.0200

WEST

The Western milk supply returned to seasonal norms in Week 40, largely due to unexpected downtime at several non-butter facilities. However, milk itself still feels tight, according to contacts. Cream availability remains steady with no major changes. Some contacts believe prices may be peaking, though they expect more clarity in the coming weeks as contracting continues. Butter inventories are not tight, and plenty of product is available. Churns continue to run seven days a week. Export demand has picked up significantly according to contacts, and the relatively low butter price continues to support export growth. Domestic demand remains soft, with markets still feeling sloppy and more buyers focused on cheese than butter. Freight remains difficult across the board, with rates jumping roughly 50% year over year. These increases are reshaping the marketplace and limiting long-distance hauling due to wider regional price spreads.

All First Sales, F.O.B., Grade AA, Conventional, and Edible Butter
Bulk Basis Pricing - 80% Butterfat \$/LB: 0.0000 - +0.0250

CHEESE

EAST

No changes are reported in milk availability or plant schedules in the East. Contacts note milk remains abundant. No changes are reported in retail or bulk cheese demand. On the CME, 40-pound blocks closed Wednesday at \$1.2700, compared to \$1.3075 at last Friday's close. Last week's Grocery Store Dairy Feature Activity report shows 2,829 Northeast stores advertising conventional 6-8-ounce shredded cheese, up from 1,332 stores a year ago. The Northeast weighted average advertised price for conventional 6-8-ounce shredded cheese is \$2.45, compared to \$2.44 a year ago. The national weighted average advertised price for 6-8-ounce shredded cheese was \$2.49 last week. The overall cheese market tone is steady.

FOREIGN

In Europe, retail demand for cheese is strong and industry sources say additional ads at grocery stores are contributing to an uptick in sales. Food service demand is steady in the region. Contacts say export interest is unchanged from recent weeks but continues to meet manufacturers' expectations. Milk output is seasonally declining in Europe, reducing availability for cheese production. Some cheesemakers suggest strong demand for milk from other dairy processors is also negatively impacting milk availability. Cheese production continues to decline in Europe, and spot inventories are very tight. Cheese prices continue to increase, and some purchasers say they are hesitant to secure loads at the higher prices offered for October.

CENTRAL

Milk supply in the Central region loosened slightly this week. Contacts report minimal changes in overall milk movement, and stakeholders continue to point to ongoing distribution challenges attributed to elevated fuel prices across the region. In the Midwest, spot load availability remains limited. Similar conditions are reported in the Southwest, where spot loads are also described as limited. As of report publication, Class III spot milk prices are between \$0.50-over to \$3.50-over. Cheese makers in the region note steady production, supported by strong orders and firm sales. Spot loads are readily available, contributing to high regional inventories. Retail cheese demand remains firm, though food service interest continues to trend below anticipated levels.

COLD STORAGE

Date/Change	Butter	Cheese
09/28/2026:	56,879	81,485
09/01/2026:	63,138	85,729
Change:	(6,259)	(4,244)
% Change:	(10)	(5)

WEST

Overall milk and cheese supply in the West are heavy, and allocations are being met without issues. Cheese manufacturers continue to receive their contracted milk loads, although Class III spot milk is tighter. Schedules are reported as stable. Cheese production remains active, with many plants running seven days a week. Plenty of cheese is available on the market, including an abundant supply of color cheddar. Export demand for cheese is strong, while domestic markets continue to feel weak and sloppy. Spot cheese loads remain readily available, and no major changes have been reported in food service demand. Freight challenges continue to affect cheese distribution. Rates have increased roughly 50 percent year over year, complicating long distance hauling and influencing regional market spreads.

FLUID MILK AND CREAM

EAST

Milk supplies are heavy across the East. Temperatures are declining seasonally. Demand is unchanged for Class I, Class II, and Class III. Yogurt demand is supporting Class II. Cheese production is ongoing, supporting Class III demand. Class IV butter churns are active in front of the holiday seasonal demand. Cream supplies are heavy. Multiples for All Classes and Class II are unchanged at the bottom end of the range and are lower at the top end. Class II condensed skim prices remain flat to over Class II. Class III condensed skim prices remain flat to over Class III. Overall, the market tone is steady.

Northeastern U.S., F.O.B. Condensed Skim	
Price Range - Class II, \$/LB Solids:	1.58 – 2.03
Price Range - Class III, \$/LB Solids:	1.46 – 1.91
Northeastern U.S., F.O.B. Cream	
Price Range - All Classes, \$/LB Butterfat:	1.6374 – 2.0468
Multiples Range - All Classes:	1.2000 – 1.5000
Price Range - Class II, \$/LB Butterfat:	1.7739 – 2.0468
Multiples Range - Class II:	1.3000 – 1.5000

CENTRAL

Milk supplies in the Central region are loosening. Contacts report ongoing distribution challenges nationwide, attributed to elevated fuel costs. Spot milk availability in the Central region remains limited. In the Upper Midwest, processors note milk component values are beginning to trend higher. Cheese manufacturers indicate that orders and sales are strong. Production schedules are steady, and inventories of colored cheddar remain elevated. Reported Class III spot prices in the Central region range from \$0.50-over to \$3.50-over. Cream supplies in the Central region remain ample, with spot loads readily available. Industry contacts report cream shipments moving across the southern border into Mexico. Cream demand is steady as facilities work to meet production needs for 82% butterfat butter. Butter makers note steady churn activity, and inventories of 80% butterfat butter remain high. Class II and Class IV demand hold steady, though some contacts anticipate a potential decline in Class II demand in the coming week.

Price Range - Class III Milk; \$/CWT; Spot Basis:	0.50– 3.50
Trade Activity: Slow	

Midwestern U.S., F.O.B. Cream	
Price Range - All Classes; \$/LB Butterfat:	1.5282 – 1.8421
Multiples Range - All Classes:	1.1200 – 1.3500
Price Range - Class II, \$/LB Butterfat:	1.6920 – 1.8421
Multiples Range - Class II:	1.2400 – 1.3500

WEST

Milk production in the West region is generally steady. Seasonal weather changes are not yet bringing major upticks in milk output. Many handlers indicate 2026 milk production is up. In California, spot milk loads are neither loose nor tight. Stakeholders note some spot loads are traveling to neighboring states. In Arizona, milk volumes are tight. Manufacturers report bringing in both spot loads of milk and condensed skim milk. In the Pacific Northwest this week, industry sources describe milk production as balanced with processing capacities. In Idaho, spot milk loads are somewhat available. 2026 dairy commodity production investments by some manufacturers in the state are putting further draws on farm level milk output this year. Spot loads are not abundant in the lower areas of the mountain states, but industry sources also note spot milk demand in Colorado is light. According to the latest National Agricultural Statistics Service (NASS) milk production report, August milk production was higher year-over-year for Colorado, Idaho, and Oregon. It also shows milk production milk production was down for Arizona, California, New Mexico, Utah, and Washington when comparing August 2026 to August 2025. Class I and II demands are stronger, while Class III and IV demands are steady. Stakeholders indicate increasing hauling rates are presenting more challenges. Cream demand is moderate, while plenty of spot load availability is reported. Cream multiples, along with condensed skim milk availability and demand are unchanged this week.

Western U.S., F.O.B. Cream	
Price Range - All Classes, \$/LB Butterfat:	1.5010 – 1.6920
Multiples Range - All Classes:	1.1000 – 1.2400
Price Range - Class II, \$/LB Butterfat:	1.6238 – 1.6920
Multiples Range - Class II:	1.1900 – 1.2400

NONFAT DRY MILK, BUTTERMILK, & DRY WHOLE MILK

Prices represent carlot/trucklot quantities for domestic and export sales packaged in 25 kg. or 50 lb. bags, or totes, spray process, dollars per pound

NONFAT DRY MILK - CENTRAL AND EAST

Low/medium heat nonfat dry milk (NDM) prices rose across both ends of the price range and throughout the mostly series in the East and Central regions this week. Production in both regions remains light as facility downtime and constrained fluid supplies limit output and spot load availability. Demand in the East and Central regions is steady, with domestic buyers purchasing only as needed. Interest from Mexico strengthened despite higher costs. Inventories in the Central and East remain light, whereas more product is available in the West. High heat NDM prices increased at both ends of the price range this week, and spot loads are very limited. Drying schedules continue to prioritize low/medium heat production, further tightening dryer availability for high heat output.

Price Range - Low & Medium Heat:	1.9400 – 2.3000
Mostly Range - Low & Medium Heat:	2.1500 – 2.2500
Price Range - High Heat:	2.2400 – 2.5000

NONFAT DRY MILK - WEST

The upward trajectory in low/medium heat nonfat dry milk (NDM) prices continues this week. Some contacts report that the Western region has more NDM available than other regions, but this supply is being picked up quickly, resulting in tight overall availability. Contacts also note that international import availability is affecting NDM supplies, and the full impact of these changes is expected to become clearer in the coming weeks. Manufacturers report tight supply, and some are not offering spot loads. Plant managers are running steady to strong drying schedules with ample milk supplies. Contacts indicate that production is contracted through December, and some buyers are contracting through 2027 to secure consistent volume. Domestic demand from traders remains strong. International demand is also solid, with contacts reporting strong sales activity to Mexican buyers. Freight costs are contributing to higher production-related expenses. High heat NDM prices also moved higher this week. The bottom of the price range held steady, while the top increased by more than 10 cents.

Price Range - Low & Medium Heat:	1.9550 – 2.2200
Mostly Range – Low & Medium Heat:	2.0300 – 2.0900
Price Range - High Heat:	2.0000 – 2.3300

DRY BUTTERMILK - CENTRAL AND EAST

Dry buttermilk production in the Central and East regions is unchanged this week. Contacts report spot loads are being sold in the regions. Full spot loads of dry buttermilk are available in the East. Demand is consistent. Reported sales moved the top of the range higher. The bottom of the range is unchanged. Market tone is steady.

Price Range:	1.7400 – 1.9000
--------------	-----------------

DRY BUTTERMILK - WEST

The dry buttermilk powder supply continues to be tight in the West. Condensed buttermilk remains available. Drying activity is not keeping pace with the volume of liquid buttermilk being produced, and contacts report that dryer capacity is the main bottleneck. Some facilities are experiencing unplanned downtime. Inventories remain lean; some contacts report being sold out through the end of the year, while others expect product to become available by the end of October. Demand from domestic and international buyers is steady. The lack of inventory has kept the dry buttermilk price range unchanged, with the mostly holding steady week over week.

Price Range:	1.7700 – 1.9000
Mostly Range:	1.8100 – 1.8600

DRY WHOLE MILK

Dry whole milk prices increased at both ends of the range for week 40. Stakeholders describe milk volumes as tight or balanced, while manufacturers continue to allocate enough milk into producing dry whole milk to meet contractual obligations. Production schedules are steady, but not heavily outpacing contractual demands as milk volumes are not in surplus. Dry whole milk spot loads remain tight as manufacturers are more focused on contractual sales than building spot inventories. Traders indicate loads can be found. Demand for dry whole milk is steady.

Price Range – 26% Butterfat:	2.2000 – 2.6100
------------------------------	-----------------

WHEY, WPC 34%, LACTOSE, & CASEIN

Prices represent carlot/trucklot quantities for domestic and export sales packaged in 25 kg. or 50 lb. bags, or totes, spray process, dollars per pound.

DRY WHEY– CENTRAL

Dry whey prices in the Central region rose across both the range and the mostly series this week. Industry contacts report stronger demand alongside tightening inventories as recent plant downtime limits regional output. Contacts indicate some brands continue to trade at the lower end, while higher demand brands command values at the top of the price range. Spot availability remains limited, with few loads moving in the region. Export interest from customers in Asia continues to add upward pressure to the overall dry whey market. Some contacts anticipate further price increases in the coming weeks as inventories in the Central region become increasingly strained. Dry whey production is steady but constrained, as select manufacturers allocate more production toward higher protein whey concentrates. Animal feed whey prices hold steady, with values remaining competitive against other dairy based feed ingredients.

Price Range - Animal Feed:	0.3500 – 0.3800
Price Range – Non-Hygroscopic:	0.6400 – 0.8000
Mostly Range – Non-Hygroscopic:	0.6900 – 0.7500

DRY WHEY– EAST

Dry whey production in the East is unchanged this week. Demand is steady. Contacts report trade activity at higher prices. The top of the price range moved higher, and the bottom is unchanged. Processors continue to direct whey streams toward higher-protein concentrates. Contacts indicate U.S.-made dry whey remains competitive with European product. Market tone is steady.

Price Range – Non-Hygroscopic:	0.6700 – 0.8000
--------------------------------	-----------------

DRY WHEY– WEST

The dry whey market in the West is shifting in week 40 as supply remains tight and a firm tone emerges. Domestic demand is steady to strong, and contacts report a firm export market. Export activity is focused on Asian buyers. Dryer time for sweet whey continues to compete with other whey derivatives, further limiting available manufacturing capacity. Several facilities producing cheese and whey reported production issues over the past week. Combined with most sweet whey being already committed to contracts, the supply available for spot purchases remains limited, according to industry contacts. Tight market conditions prompted slight movement at the bottom of the price range, while the top of the range remained unchanged. The mostly price increased on both ends.

Price Range – Non-Hygroscopic:	0.6800 – 0.7600
Mostly Range – Non-Hygroscopic:	0.6900 – 0.7500

WHEY PROTEIN CONCENTRATE

Whey protein concentrate (WPC) 34% prices are edging lower at the bottom of the range, while holding steady at the top, and the mostly range remains firm. Production is unchanged and inventories are extremely tight, leaving buyers struggling to secure product. Contacts report turning to the import market to supplement needs due to limited domestic availability. WPC 34% is beginning to compete with WPC 80% and whey protein isolate (WPI) on a per-pound protein basis. Spot trading continues to command a premium. Feed-grade product is also moving higher, supported by rising nonfat dry milk values. Multiple offers were reported well above the published range. Overall, upward price momentum persists, reinforcing a firm to increasingly strengthening market tone. Regular and instant WPC 80% are mostly trading from the low \$10s to the mid-\$11s. Activity is slow, though interest remains. Some contacts note that with WPC 80% activity easing and inventories available, producers may shift some production toward WPI. WPI prices remain in the \$14s, with a firmer tone and tighter availability than WPC 80%.

Price Range - 34% Protein:	2.0000 – 3.1000
Mostly Range - 34% Protein:	2.3500 – 2.7000

LACTOSE

Lactose prices increased at both ends of the range and mostly price series for week 40. Markets continue to be firm and trending higher for the start of Q4. Spot load availability is tight, especially for 100-mesh lactose. Demand varies from steady to stronger. Some stakeholders note production of high protein whey commodities outside of the U.S. is increasing and this may decrease export demand for lactose. Production schedules are steady

Price Range - Non Pharmaceutical:	0.5700 – 0.8000
Mostly Range - Non Pharmaceutical:	0.6600 – 0.7400

CASEIN

The price range for acid casein is unchanged this week. Contacts say contract prices for Q4 are down from Q3 and loads priced at these lower prices will begin shipping in the coming weeks. Strong milk output in Oceania is contributing to an uptick in acid casein production. Contacts in Oceania report strong demand for acid casein in the region and say interest from purchasers in other regions is steady. Spot loads are available to meet current market demands. Prices for rennet casein are holding steady, amid light spot trading. Contract purchasers say prices are relatively unchanged from Q3 to Q4. Demand for rennet casein is light in Europe, but contacts in the region report steady interest from purchasers in other regions. Declining milk output in Europe is negatively impacting rennet casein production. Spot inventories are somewhat snug, though purchasers say they can find loads if they search for them.

Acid Casein Price Range:	4.2500 – 5.2500
Rennet Casein Price Range:	4.3000 – 5.4500

ORGANIC DAIRY MARKET NEWS

Information gathered September 21 – October 2, 2026.

ORGANIC DAIRY MARKET OVERVIEW

The Transition to Organic Partnership Program (TOPP) was formed through cooperative agreements between the USDA and non-profit organizations and invested \$100 million from 2022-2026 to provide technical assistance and support for transitioning and existing organic farmers. As of June 30, 2026, groups involved with TOPP hosted over 3,100 events during the life of the program and provided technical assistance to around 7,600 people. The program led to the creation of 4,100 mentorship pairs, which represents 158,000 acres of farmland transitioning to organic, 88,100 of these acres are now certified organic. The TOPP initiative ended on September 30, 2026, though participating organizations plan to continue providing support for new and transitioning farmers. To find out more about these organizations, or find helpful resources visit the TOPP website at the following link:

<https://www.organictransition.org/>

At Arizona State University, the Swette Center for Sustainable Food Systems launched a new mentorship program, as a follow up to TOPP, named Kernel, on October 1. Kernel is working with regional partners previously involved with TOPP, to support mentoring relationships, and to provide assistance for transitioning farmers. The program plans to support the growing organic industry and provide opportunities for future generations of farmers. To learn more about Kernel, visit:

<https://www.grow-organic.org/>

The Vermont Monthly Organic Dairy Report, a report created as part of the Organic Dairy Initiative sponsored by the 2018 Farm Bill, covering July 2026 was released on October 02, 2026. This report showed the weighted average price for fluid milk decreased 3.41 percent from June. Total volume, average monthly production per cow, and weighted average butterfat increased from last month. Daily production per cow and weighted average protein decreased. To view this report in its entirety visit:

https://www.ams.usda.gov/mnreports/vt_da001.pdf

	Volume (lbs)	Avg	Daily Prod/Cow	Butterfat	Protein
May 2026	1,146,694	\$37.80	55.29	4.08%	3.19%
June 2026	773,087	\$39.89	55.66	3.91%	3.17%

The USDA AMS National Organic Program (NOP) provides an email notification service, the Organic Insider, to send out updates to the organic community. The NOP Organic Insider from September 25th discussed a publication in the Federal Register titled National Organic Program: Notice of Intent to Extend and Revies a Previously Approved Information Collection (2027). This publication is requesting approval from the Office of Management and Budget to collect necessary information for the Organic Foods Production Act and for the enforcement of organic regulations. The public is welcome to make comments regarding the accuracy or necessity of information collected through November 24, 2026.

To learn more from Organic Insider, view archives, or register to receive updates by email visit:

<https://www.ams.gov/reports/organic-insider>

ORGANIC DAIRY FLUID OVERVIEW

Federal Milk Market Order 1, in the Northeast, reports utilization of types of organic milk by regulated plants. During August 2026, organic whole milk utilization totaled 18.068 million pounds, down from 17.24 million pounds the previous year. The butterfat content, 3.28 percent, is up from 3.29 a year ago. The utilization of organic reduced fat milk, 15.94 million pounds, decreased from 15.45 million pounds a year ago. The butterfat content, 1.56 percent, is up from 1.50 percent last year.

European organic milk average pay prices for July 2026 increased in Austria and France, but decreased in Germany and Bavaria, compared to June. The average pay price in July 2026 was up from a year ago in France, but down in Austria, Germany, and Bavaria.

Organic Milk Pay Prices in Europe – July 2026

Country	Euros/100KG	*(USD/100KG)	% Change Jun 2026	% Change Jul 2025
Austria (1)	54.88	\$62.62	+0.64	-11.56
Austria (2)	60.98	\$69.58	+1.18	-9.77
Germany	63.93	\$72.95	-0.54	-2.65
Bavaria	64.67	\$73.79	-0.29	-2.16
France	50.78	\$57.94	+6.30	+1.10

*Results are based on July 15, 2026, exchange rate of 1 Euro/1.14103 USD. Austria (1) prices exclude "haymilk," Austria (2) prices include "haymilk" which is produced by cows mainly fed grasses and dry hay, rather than silage.

A large Dutch organic milk processor announced that the guaranteed price for organic farm milk in October 2026 is 65.25 EUR/100 kilograms (kg) (\$76.11 USD), down 0.25 from September 2026. Organic markets are relatively steady, and the processor stated the lower price is to correct for the previous period. The guaranteed organic price applies to 100 kg of milk with standard component levels: 3.57 percent protein and 4.49 percent fat. The amounts apply to an average supply of 600,000 kg of milk annually.

A cooperative announced their October organic milk pay price increased 1.82 pence per liter (ppl) in the UK, which includes a .06 ppl increase for the quarterly exchange adjustment, 58.25 pence per liter (ppl), \$0.77 USD. The announcement stated global milk supplies have stabilized but remain high, commodities markets are in balance, and the outlook for organic markets is stable.

CONTINUED ON PAGE 8A

CONTINUED FROM PAGE 8

In a recent report from a Pacific Northwest livestock auction, the top 10 organic cull cows traded higher than conventional cull cows, while the overall price for organic cull cows was higher than conventional cows. The average price for the top 10 organic cows auctioned was \$155.22 per hundredweight, compared to an average price of \$162.50 per hundredweight for the top 10 conventional cows auctioned. The average weight for the top 10 conventional cows was 1,561.5 pounds compared to 1,050.0 pounds for the top 10 organic cows. The overall price for organic cows auctioned was \$136.68 per hundredweight with an average weight of 951.4 pounds, while the overall price for conventional cows auctioned was \$122.8 per hundredweight with an average weight of 1,155.7 pounds.

NATIONAL ORGANIC GRAIN AND FEEDSTUFFS

The following was reported by USDA AMS Livestock, Poultry, and Grain Market News (LPGMN) in the National Organic Grain and Feedstuffs Report. Compared to last period, trade was active with good demand. The new crop corn and soybean harvest is limited with the expectation to be fully underway in a couple of weeks. Country elevator: spot market old crop feed corn sold 1.21/bu higher delivered. Forward contracts this period are set for Q3 2026 to Q1 2029 delivery. There were no comparable spot market trades for feed soybeans. Forward contracts this period are set for Q3 2026 to Q4 2028 delivery. Feed Mill: spot market old crop feed corn sold 94 cents/bu lower delivered; new crop 23 cents/bu lower delivered. Forward contracts this period are set for Q3 2026 to Q3 2027 delivery. Spot market old crop feed soft red winter wheat sold 39 cents/bu higher delivered. Forward contracts this period are set for Q3 2026 to Q4 2026 delivery. Crush Facility: spot market old crop feed soybeans sold 6 cents/bu higher delivered. Forward contracts this period are set for Q3 2026 to Q4 2026 delivery. The next report will be published on Wednesday, October 14, 2026.

ORGANIC DAIRY RETAIL OVERVIEW

In Week 40, organic dairy ads increased 40 percent from last week and every organic commodity except milk appeared in more ads compared to the prior survey. Cream cheese and sour cream were absent from the Week 39 ads but were present this week. Ice cream had the largest week-over-week gain in ads, moving up 210 percent this week. The most advertised organic commodity was milk.

Organic milk ads decreased 5 percent this week. Organic gallon milk ads fell 38 percent while half-gallon ads were down 3 percent. The weighted average advertised price (average price) for organic half-gallon milk gained 10 cents to \$4.37 this week. Conventional milk sold in the same package size had an average price of \$1.77. The Week 40 organic premium for half-gallon milk is \$2.60.

Ads for the second most advertised organic commodity, cheese, were up 111 percent from last week's survey. 6-8-ounce sliced style cheese appeared in more ads than any other organic cheese product. Ads for this product were up 171 percent, and the average price was \$4.76, down 1 cent from last week. Conventional 6-8-ounce sliced style cheese had an average price of \$2.53, leaving an organic premium of \$2.23 for Week 40.

The third most advertised organic commodity was yogurt, appearing in 100 percent more ads this week. The most advertised organic yogurt product was regular style in 32-ounce containers, with ads up 73 percent. The average price for this product was \$5.13, down 11 cents. Conventional 32-ounce regular style yogurt had an average price of \$3.64, and this week's organic premium was \$1.49.

Organic butter remained the fourth most advertised organic commodity for the third week in a row, appearing in 124 percent more ads compared to last week. Organic 8-ounce butter did not appear in retail ads this week, after appearing in Week 39. Ads for 1-pound organic butter increased 216 percent in Week 40, and the average price is down 25 cents to \$7.97. Conventional 1-pound butter's average price is \$3.58, making an organic premium for this product of \$4.39.

Final Class Prices by Order, September 2026

September 2026 Highlights

Class Prices: The following are the September 2026 class prices under the Federal milk order pricing system and changes from the previous month: Class II: \$17.60 (\$-1.11), Class III: \$16.04 (\$-0.60), and Class IV: \$18.94 (\$+1.58).

Component Price Information: Under the Federal milk order pricing system, the butterfat price for September 2026 is \$1.4762 per pound. Thus, the Class II butterfat price is \$1.4832 per pound. The protein and other solids prices for September 2026 are \$2.6619 and \$0.4147 per pound, respectively. These component prices set the Class III skim milk price at \$11.27 per cwt. The September 2026 Class IV skim milk price is \$14.27, which is derived from the nonfat solids price of \$1.5343 per pound.

Product Price Averages: The product price averages for September 2026 are: butter \$1.4462, nonfat dry milk \$1.7891, cheese \$1.5577, and dry whey \$0.6694.

Final Class Prices by Order, for September 2026

Federal Milk Order Minimum Class Prices for Milk of 3.5 Percent Butterfat ^{1, 2}

Federal Milk Order Marketing Area ³	Order Number	Sep 2026				Oct 2026
		Class I	Class II	Class III	Class IV	Class I
		(dollars per cwt)				
Northeast (Boston)	001	22.14	17.60	16.04	18.94	23.98
Appalachian (Charlotte)	005	22.64	17.60	16.04	18.94	24.48

Arizona (Phoenix)	131	19.64	17.60	16.04	18.94	21.48
All-Market Average		21.16	17.60	16.04	18.94	23.00

¹ To convert the Class I price per 100 pounds to the Class I price per gallon, divide by 11.63 - the approximate number of gallons in 100 pounds of milk. ² The mandatory \$0.20 per cwt processor assessment under the Fluid Milk Promotion Order is not included in the Class I prices shown on this table. ³ Names in parentheses are the major city in the principal pricing point of the markets.

Class I Prices for each order are calculated by adding the appropriate Class I differential (determined by each order's physical county base location) to the monthly Base Class I Price. Each order's base location and class I differentials are as follows: Northeast Order 001 (Boston, MA) \$5.10; Appalachian Order 005 (Charlotte, NC) \$5.60; Florida Order 006 (Tampa, FL) \$6.80; Southeast Order 007 (Atlanta, GA) \$5.80; Upper Midwest Order 030 (Chicago, IL) \$3.20; Central Order 032 (Kansas City, MO) \$3.20; Mideast Order 033 (Cleveland, OH) \$3.80; California Order 051 (Los Angeles, CA) \$2.80; Pacific Northwest Order 124 (Seattle, WA) \$2.70; Southwest Order 126 (Dallas, TX) \$3.70; Arizona Order 131 (Phoenix, AZ) \$2.60.

Market Summary and Utilization Report, August 2026

Highlights. During August, 13.7 billion pounds of milk were received from Federally pooled producers. This volume of milk is 5.3 percent higher than the 2025 volume. Regulated handlers pooled 3.3 billion pounds of producer milk as Class I products, up 0.8 percent when compared to the previous year. The all-market average Class utilization percentages were: Class I = 24%, Class II = 13%, Class III = 54%, Class IV = 9%. The weighted average statistical uniform price was \$18.75 per cwt, \$0.43 lower than last month and \$0.60 lower than last year.

Federal Milk Order Marketing Area ¹	Order Number	Receipts of Producer Milk		Utilization of Producer Milk in Class I

Advertised Prices for Dairy Products at Major Grocery Store Outlets ending during the period of 9/26/2026 to 10/8/2026

The information contained in this report reflects prices advertised by major grocery retailers to consumers through circulars and digital promotions and gathered by USDA through a weekly survey.

In week 40, conventional and organic dairy ads increased. Conventional ads rose 22 percent and organic ads jumped 40 percent. Cottage cheese and flavored milk appeared more frequently in conventional ads, while cheese and ice cream remained the most advertised conventional items. Ice cream and butter saw the sharpest increase in organic ads and organic milk continues to take the spotlight as the aisle's most heavily advertised organic item.

Conventional cheese ads rose 22 percent week over week and organic cheese ads increased 111 percent. Ads for conventional 6 8 ounce shred style cheese grew 24 percent and the weighted average advertised price (average price) increased 25 cents to \$2.74. Organic 6 8 ounce shred style cheese ads rose 28 percent, with an average price of \$4.71, down 28 cents. The organic premium for this product in week 40 is \$1.97.

Ice cream remains the second most advertised conventional commodity, with ads up 18 percent this week. In contrast, organic ice cream ranks as the fifth most advertised organic commodity and ads increased 210 percent over last week. Conventional and organic aisles diverged: 14 16 ounce containers were the most advertised for conventional ice cream, while 48 64 ounce containers were most advertised for organic. Ads for 14 16 ounce conventional ice cream rose 31 percent and the average price fell 46 cents to \$3.69. The average price for organic 48 64 ounce ice cream is \$9.33, down 15 cents.

Ads for conventional milk increased 84 percent while organic milk ads declined 5 percent. The average price for conventional gallon milk edged up 6 cents to \$2.82. The average price for organic gallon milk is \$7.49, down 11 cents week over week, and down 34 cents year over year from the prior year average of \$7.83. The organic premium for gallon milk in week 40 is \$4.67.

REGIONAL DEFINITIONS

As used in this report, regions include the following states:	
NORTHEAST U.S.	Connecticut, Delaware, Massachusetts, Maryland, Maine, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island and Vermont
SOUTHEAST U.S.	Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia
MIDWEST U.S.	Iowa, Illinois, Indiana, Kentucky, Michigan, Minnesota, North Dakota, Nebraska, Ohio, South Dakota and Wisconsin
SOUTH CENTRAL U.S.	Arkansas, Colorado, Kansas, Louisiana, Missouri, New Mexico, Oklahoma, and Texas
SOUTHWEST U.S.	Arizona, California, Nevada and Utah
NORTHWEST U.S.	Idaho, Montana, Oregon, Washington, and Wyoming
ALASKA	Alaska
HAWAII	Hawaii
NATIONAL	Continental United States

- 1--Dairy Market News surveys nearly 130 retailers, comprising over 22,000 individual stores, with online weekly advertised features.
- 2--As of October 1, 2022, the previous year weighted average prices and store counts will be calculated using the date from the prior year that most closely matches the current report date.
